RISO EZ201	Master-Making / Printing Methods	High-speed digital master-making / Fully automatic stencil printing
	Original Type	Book, Sheet
	Original Size	When using the Glass Platen : 50 mm x 90 mm - 310 mm x 432 mm When using the AF-VI (option) : 100 mm x 148 mm - 310 mm x 432 mm
	Original Paper Weight	When using the Glass Platen : 10kg or less When using the AF-VI (option) : 50g/m ² - 128g/m ²
	Scanning Area (max.)	297 mm x 432 mm
	Print Paper Size	100 mm x 148 mm - 310 mm x 432 mm
	Paper Supply Capacity	1000 sheets (64 gsm)
	Print Paper Weight	Standard : 46 gsm - 157 gsm When using the Card Feed Kit (option): A4 and smaller size (100 gsm - 400 gsm) Legal and smaller size (100 gsm - 310 gsm) A3 and smaller size (100 gsm - 210 gsm)
	Image Processing Mode	Line, Photo, Duo, Pencil
	Resolution	Scanning resolution: 300dpi x 600dpi Print image resolution: 300dpi x 300dpi
	Master-Making Time	Approx. 25 seconds (for A4 / Landscape / 100% reproduction ratio)
	Printing Area (max.)	210 mm x 290 mm
	Print Reproduction Ratio	3 enlargements: 116%, 122%, 141% 3 reductions: 87%, 82%, 71% Margin+: 94%
	Print Speed	60 ppm - 130 ppm (5 steps variable)
	Print Position Adjustment	Vertical: ± 15 mm Horizontal: ± 10 mm
	Ink Supply	Fully automatic (1,000 ml per cartridge)
	Master Supply / Disposal	Fully automatic (295 sheets per roll)
	Master Disposal Capacity	Approx. 100 sheets
	User Interface	LED Panel with Progress Arrow indicators, Front Side Operation
	Power Source	EZ201A: 220V - 240V AC, <1.3A> 50Hz - 60Hz EZ201E: 220V - 240V AC, <1.3A> 50Hz - 60Hz
Dimensions (WxDxH) without Stand	When in use: 1415mm(W) x 655mm(D) x 665mm(H) When in storage: 780mm(W) x 655mm(D) x 665mm(H)	
Weight without Stand	Approx. 100kg

EZ201 Digital Duplicator — A smart choice for management-friendly value plus user-friendly operation

What would optimize your print job operations?
Lower costs? Faster speed? Higher image quality?

RISO EZ series digital duplicators offer lower running costs and higher printing speed to achieve greater expense reduction and productivity than photocopiers and printers can provide.

They can process large-batch printing to maximize efficiency in many ways, delivering everything from fixed-form documents to envelopes, cards, leaflets, educational materials and more.

The EZ201's A4-size print capability, versatile performance and affordable price make it the smart solution for handling a wide range of printing work.

Cost efficiency

Ease of use

Productivity

High image quality

Durability and Sustainability

Higher print volumes — But we don't want higher costs

The higher the volume, the lower the running cost per print. Great for envelopes and cards, too.

Overall operating costs for photocopiers and printers can be surprisingly higher than you imagine. But RISO EZ series digital duplicators reduce the cost per print of higher-volume jobs. How? By scanning the paper original or sending data from a PC for master-making, realizing greater cost efficiency than photocopiers, other printers or outside print shop services can provide.

● Ink Saving Mode

The Ink Saving Mode minimizes ink usage — making large-volume printing especially cost-effective.

● Saves paper, too

To reduce paper costs, the machine can print multiple originals onto one sheet of paper.

More savings!

● Allows special-paper printing in-house

The EZ201 can handle special papers including thick paper, thin paper, envelopes and cards, so you can print more in-house and reduce outsourcing. Use less costly paper to cut costs even further.

Many operators to satisfy — We hate complications

With its photocopier-like output functionality, anyone can use the EZ201 with its simple two-step operation.

No worries — anyone can operate the machine as if it was an ordinary copy machine. Output setting is simple.

1. Set the original and press the start key to make a master.

2. Input the number of prints desired and press the start key again to start printing.

More ease of operation!

Convenient master disposal Only from RISO

The Master Disposal Box is compact and upright, so disposing of used masters stored in it is as simple as pushing a lever. And you won't stain your hands.

Easy replacement of consumables

An LED blinks to indicate that ink or masters are running low. Replacing ink bottles is as easy as a single click after opening the front door. Masters are easy to change, too.

Color Universal Design NEW

With operational color design authorized by Color Universal Design Organization, operation parts are arranged for easy identification and with consideration for people with color vision deficiency.

**Don't spend too much time printing —
Productivity is important**

Extra-fast printing up to 130 pages per minute, plus easy sorting by groups

Suddenly need a large volume of prints? Don't panic. The EZ201 can print at a maximum of 130 pages per minute. That's over 1,000 pages in only eight minutes — much faster than photocopiers or printers can perform.

Time required to print 1,000 pages

Only from RISO

Paper output mechanism neatly stacks papers at high speed

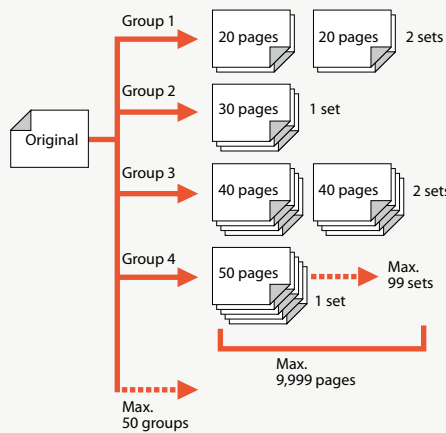

Thanks to the paper output mechanism, papers are output at high speed and neatly stacked on the V-shaped paper receiving tray. The receiving tray paper guides are designed so that they can be tilted outward for easy paper removal.

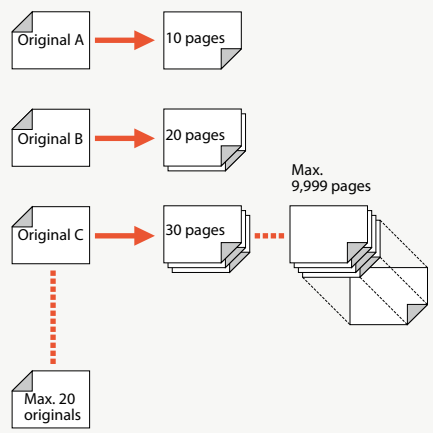

More productive!

Program output for easy group sorting
Besides speedy printing, the EZ201 is capable of quickly sorting output documents by group. Use Program A to output different quantities of prints per group, or Program B to output different quantities per page of multiple-page originals. Programs can be saved for later retrieval, so there's no need to repeat input routines each time. Also, an optional Job Separator raises sorting efficiency by inserting tape to mark the end of a job.

Program A

Program B

Appearance often matters — We want beautiful results

High-quality output from any kind of original.

The EZ201 does a beautiful job of printing high-quality text and images for a range of work — fixed-form documents, envelopes, leaflets, teaching materials and more.

● Clearer photos

Use dot screening (fine/coarse) for clearer photo image output.

● Higher quality printing with a PC

The optional RISO PC Interface Card USB2.0 enables direct printing from a PC via USB cable, which keeps the output looking more beautiful. An optional RISO Network Card enables network connection.

● Optional color drum for adding color

Spot color can help documents stand out. The machine's color drum is designed to be light, easy to set and user-friendly. It accommodates a wide variety of inks in 21 standard colors, 50 custom colors, plus special order-made colors that can give corporate logos an extra-special look.

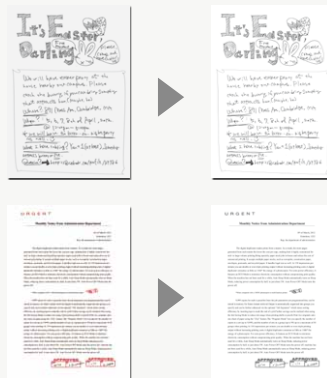

More beautiful!

● Optimum output, faithful to the original

For optimal output, the EZ201 features four preset image processing modes: Line, Photo, Duo (line/photo/shadow off) and Pencil (darker/lighter).

● Clearly reproduces penciled text and stamp marks

Press the pencil key for clearer output of text and lines faintly drawn by pencil as well as stamp marks.

You'll want to use it for a long time — Environmental friendliness matters

The EZ201 passes the one-million-output test. It's environmentally friendly, too.

The one-million-output and other durability tests make the machine supremely reliable. It's built to last, extending its cost-effective qualities to the limit. With such high performance made for posterity, the EZ201 is an exemplary long-term performer.

More safety!

Friendly to the environment

The EZ201 consumes energy very sparingly, using just about 1/6th* of the power that a photocopier requires. The ink it uses is made of eco-friendly soy oil. RISO makes products that conform to the International Energy Star Program.

*When compared with a B&W photocopier of approx. 1500W.

Full security

The EZ201 features security functions that can limit user access or secure original data in order to protect against information leakage. After printing, the master remains on the drum so that it can be printed at any time. Turn on Confidential mode, and the master on the drum is disposed of to safeguard against undesired printing of confidential documents.

RISO i Quality System

Only from RISO

The RISO i Quality System offers a large number of quality and convenience benefits. Among them are:

- Automatic assurance of optimum print quality
- Prevention of operator error
- Warning of shortages in remaining ink/master volume
- Minimized paper waste

RISO i Quality System™

The RISO i Quality mark indicates a RISO product compatible with the RISO i Quality System.
